

Name: Lito J. Libradilla	Yr. & Sec.: Grade 12 – STEM Asclepius
Subject Code: STEM 09	Subject: Immersion

1. In your own opinion, what is immersion?

In my perspective, immersion refers to a deep involvement or absorption into a particular environment, experience, or activity. It often implies a level of engagement that captures one's full attention and creates a sense of being fully present in the moment or context. This can apply to various aspects of life, such as immersive experiences in virtual reality, deep engagement in learning, or complete involvement in a particular task or project.

2. How is Immersion different from On-the-Job Training (OJT)

On-the-Job Training (OJT) is a specific type of learning experience where individuals acquire skills and knowledge by directly participating in real work activities within a workplace. Immersion, on the other hand, is a broader concept that can extend beyond the workplace and includes being deeply engaged in any given experience, not necessarily limited to job-related tasks. While OJT is a form of immersion, immersion can encompass a wider range of scenarios, including cultural immersion, language immersion, or immersive learning experiences that may not necessarily involve a traditional job setting.

3. What are your expectations in the subject?

Expectations in subject immersion include gaining a deep understanding, fostering engagement, applying knowledge practically, enhancing retention, developing skills, achieving holistic learning, promoting personal growth, fostering cultural competence, improving collaboration and communication, and encouraging reflection and integration.

4. What are your ideal occupation?

Cooking, I have a long year already in Baking.

5. Pick one specific job that is related to your track and strand that you wanted to do.

Inventing taste cookery, bread and pastry, food and beverage.
